

Briteline® WrapCAST Overlamine

Rise Above The Competition With..

Briteline®
WrapCAST Overlamine

Briteline WrapCAST overlaminates provide your printed graphics with the ultimate protection! The perfect finish can be achieved using either the gloss, satin or matte version. Extreme comfortability is a result of the 2-mil thickness and high flexibility of the product. Pairing Briteline WrapCAST overlaminates with the Briteline WrapCAST vinyl is a perfect combination for all your vehicle wrap applications!

Why Should You Use Overlamine?

- To extend the life and color of your graphics
- To protect against abrasions and UV rays which will cause your graphics to yellow
- To protect the ink and the rate of which it could fade
- To modify the finish of your graphics

OLWC Features

- 2 mil cast
- Gloss, satin or matte finishes
- 7 year durability
- 2 year shelf life
- Superior protection against UV radiation & abrasions
- Adds longevity to the underlying graphics
- Ultra-flexibility
