	Cotton	Cotton/ Polyester (Mixture)	Polyester/ Acrylic (Mixture)
G-FLEX GLITTER G-FLEX ULTRA GLITTER	320° F 15 sec. 2.5 – 3.5 bar (medium pressure)		

G-FLEX ULTRA GLITTER may be sublimated using indirect sublimation, either before or after pressing glitter to the garment.

*Paper heat settings may differ.

Can be layered as final top coat.

Features

G-FLEX ULTRA GLITTER and G-FLEX GLITTER are heat sealable flex films intensely coated with sparkling, optically attractive blended glitter powder and can be used for lettering T-shirts, fashion & leisure wear and promotional accessories.

G-FLEX ULTRA GLITTER has a textured feel, with good wash resistance. G-FLEX ULTRA GLITTER is the easiest glitter product to weed, with slight stretch for comfort.

G-FLEX GLITTER has a smooth feel over the glitter particles, decreasing mechanical abrasion and increasing wash resistance. G-FLEX GLITTER is very soft and stretchy.

G-FLEX ULTRA GLITTER and G-FLEX GLITTER are suitable to transfer onto textiles such as cotton, mixtures of polyester/cotton and polyester/acrylic.

The raw materials in G-FLEX ULTRA GLITTER and F-FLEX GLITTER are ecologically inert, do not contain PVC, plasticizers or heavy metals (in accordance with OEKO-TEX STANDARD 100 category 1 and CPSIA Compliant).

Application instructions

Plotter settings

Blade: G-FLEX GLITTER ULTRA – 60°

G-FLEX GLITTER – 45°

Cut style: Cut this material in mirror image
